

COVID-19 PRODUCT LIST

SVIZERA EUROPE BV

Dear valued customer,

It is a troubled and tumultuous period in which the global health care is under pressure due to COVID-19. Rules and measures can change from one day to the other.

At Svizera Europe we do our utmost to ensure that essential COVID-19 protection, diagnostic and patient care items are available for our customers. In addition to our regular product list, Svizera Europe BV can also supply the following items:

- Personal Protective Equipment (PPE)
- Diagnostic
- Patient Care

Svizera Europe applies a policy in which the safety of the personnel is paramount. From the start of the outbreak a large part of the Svizera Europe team works remote from home and a skeleton team in the warehouse and office. The skeleton team is divided in shifts. Both teams are available during office hours.

The warehouse and office of Svizera Europe is classified according to the RIVM guidelines (National Institute for Health and Environment) like: hygienic measures, social distancing and workplaces with the correct distance.

By taking our responsibility and following the measures, Svizera Europe can continue providing medicines and medical supplies to the people who need it most in vulnerable countries and regions.
