SVIZERA EUROPE BV

version 2021.1

Dear valued customer,

Detecting and diagnosing tuberculosis is a main priority in order to fight this disease in developing countries. Therefore, Svizera Europe BV offers a range of equipment, consumables, reagents and kits for diagnostic purposes.

Our aim is to manufacture and distribute those products needed by our clients. In this perspective and through our strong sourcing capabilities, we are able to supply most generic pharmaceuticals, medical and laboratory supplies required in the field.

We give special consideration in this respect to ensure that the delivered reagents can be transported into the countries in such a way that they comply with international regulations and safety procedures.

Svizera Europe has experience in developing kits for laboratories, and can ensure that sufficient quantities of each kit component are present to carry out the desired number of tests. For specific request please do not hesitate to contact us.
