
WASH KITS

SVIZERA EUROPE BV

Dear valued customer,

Svizera Europe has extensive experience with kitting and hold several LTA's for well-known high quality demanding clients, mostly UN organizations.

Due to the stringent ISO quality and assembly system Svizera Europe makes sure all kits are supplied at the highest quality and punctuality.

In addition to all the kits mentioned in this product list, Svizera Europe BV can also supply a wide range of medical supplies and generic pharmaceuticals. As the list of products is extensive, we had decided not to list each separate product in our product list.

Please contact us for any requests including kits, essential medicines, medical consumables and equipment or chemicals. We will then go through the requirements and we will prepare a quotation accordingly.

For more information about our kits, please visit our website: svizera-kits.org or contact us.
